## 3-LAYER PVC MATERIAL

The middle layer is reinforced with a **nylon mesh**, which strengthens the structure and ensures durability for years. The outer layers provide **resistance to punctures and weather conditions**.

## DURABLE FRAME

The pool frame is **corrosion-resistant** and designed to **keep the structure stable and upright**. Thanks to it, the water reaches the proper level, allowing children to safely learn swimming.

## PUMP INCLUDED

The set includes a **filter pump with all necessary accessories**. The pump helps **keep the water clean** and ensures proper **aeration**.

The pump is powered by **220-240 V** and has a capacity of **2006 L/h**.

## HYDRO AERATION TECHNOLOGY

This technology allows **air to be infused into the water during filtration**.

Millions of air bubbles are generated by the pump, making the water **easier to clean and filter**, healthier, and more pleasant on the skin. The process also **oxidizes iron and manganese**, improving water clarity.
